Quantitas Solutions

Empowering AI-driven healthcare
Mission

A network of clinicians determined to accelerate the potential of AI in healthcare

WE UNDERSTAND THE CHALLENGES

Complex playing field of healthcare, AI, data and compliance

1	2	3	4	5
DEVELOPMENT	**ACQUIRE DATA**	**ANNOTATE**	**PERFORMANCE**	**COMPLY**
Your goal: develop an AI model that will detect abnormalities	Get access to high-quality and high volume medical image data	Train your deep learning models on the enriched medical image data	Validate the results that your AI solution delivers to guarantee the highest possible accuracy	You are acting in a strictly regulated industry so compliance is key to success

Challenges

You are not trying to detect the obvious. True medical expertise needed to understand what to deliver in a conservative industry	Medical data can be found relatively easy. High-quality medical data with the volume needed for AI purposes is a different story	Accurate clinical annotations in this field need to be done by medical experts. Garbage in = garbage out	Medical expertise needed to translate AI driven results to practical usability and integration in existing processes	Upcoming EU AI Act, traceability of data and patient consent. To name a few challenges in a fast moving environment

Our Services

AI-driven healthcare

1 **Medical Annotations**

Together with you, we define your upcoming annotation needs and with the proper level of expertise we provide you with the best annotations.

2 **European medical data**

Quantitas Solutions has partnerships with private clinics and commercial hospital chains and delivers your requested medical data conform all regulations.

3 **Consultation of AI development**

Our team has expertise regarding e.g. the upcoming EU AI act, GDPR, AI developments and medical expertise from all subspecialties.

ABOUT US

Quantitas Solutions

Roderick Holewijn, MD, PhD
Chief Medical Officer

Lucas Zielstra
Business Development Director

Wiebe Zwaan, LLM
Chief Legal Officer

Arno Bisschop, MD, PhD, MSc
Innovation Director

Mariya Rubens, MD
Business Development Manager (DACH)

*Ralf de Haan, MSc*
Chief Technology Officer

Erik Ranschaert, MD, PhD
Strategic advisor

Our talented clinicians and medical students trained to perform top-notch annotations
Medical annotation experts
